

***Premise***

The NATO Codification System makes it possible to identify, classify and attribute an NSN (NATO Stock Number) to each supply item, obtaining the maximum functionality of the logistics system and facilitating the management of materials.

For these reasons, the NCS System was unanimously accepted and adopted by all the signatories of the Atlantic Alliance treaty.

It is based on the <one item - one number> principle, as an NSN identifies one and only one supply item.

Here below we confirm that the assigned NCAGE code to the OMPECO srl company with headquarter in Avigliana (TO) – Italy, C.so Laghi 11 is the follow one:

NCAGE: **AH649**

State: A - ACTIVE CODE

Organization Type: E - Manufacturer
